06

DISCUSSION

PURPOSE:

**DISCUSS OPTIONS FOR
UPDATING THE
COUNTY'S DEVELOPMENT
REGULATIONS**

www.codewrightplanners.com

CHALLENGES

Facing the County

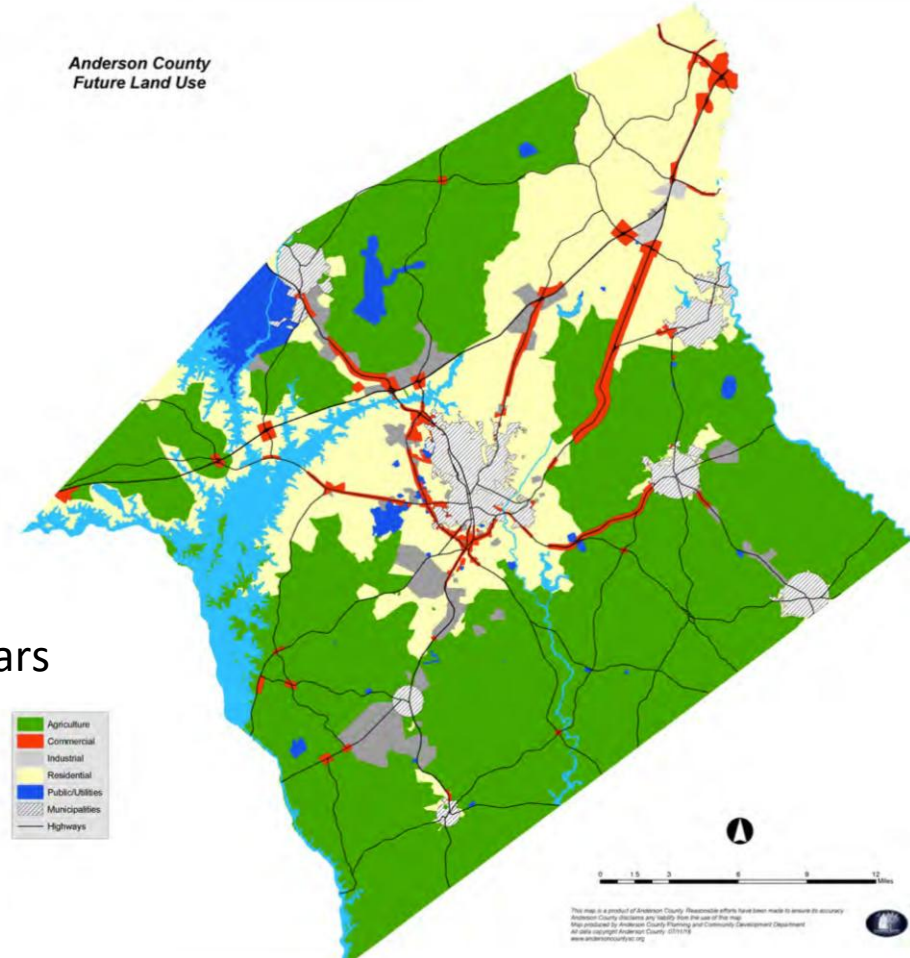

- **GROWTH PRESSURE**
(too much in some places, not enough in others)
- **INSUFFICIENT REGULATORY TOOLS**
(hard to follow, unpredictable, lack of standards)
- **STORMWATER RUNOFF**
(erosion, sedimentation, nuisance flooding)
- **MASS GRADING**
(clear cutting, loss of community character)
- **DEVELOPMENT QUALITY**
(roadway capacity, tract housing, few incentives)
- **RESOURCE PROTECTION**
(farms, forests, slopes, property values)

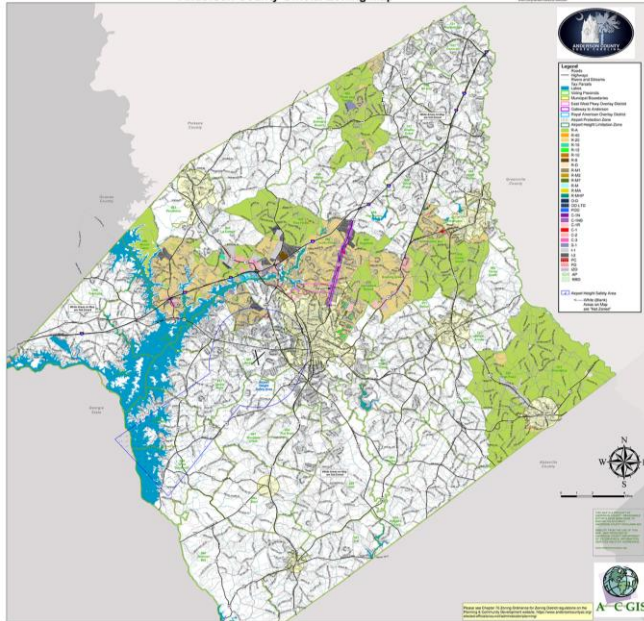

COMPREHENSIVE PLAN

- Adopted in 2016; update underway
- Guides growth and development
- SC Code requires update every 10 years
- Future Land Use Map is the only guide in un-zoned areas
- **Are Resources Adequate?**

Anderson County
Future Land Use

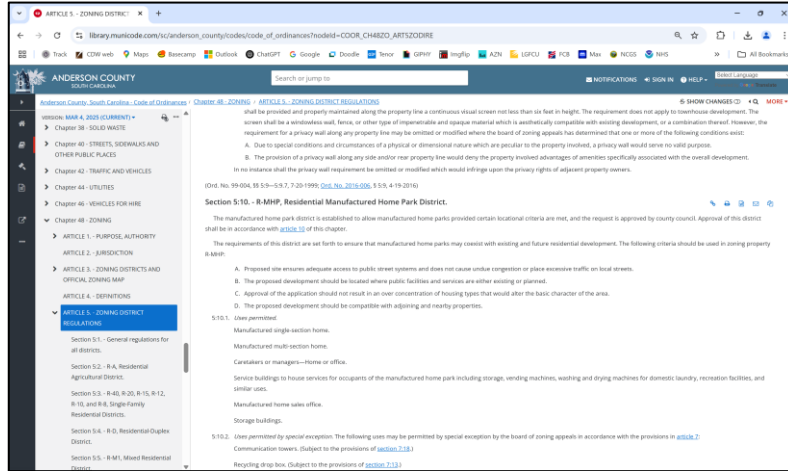

ZONING

- About 20-25% of the County is zoned (most isn't)
- It is a good tool for managing growth and raising development quality, but opinions differ on its value
- Establishment of new zoning currently requires referenda
- **Is it time to discuss strategic expansion of new zoning?**
- **Are there different ways of establishing new zoning?**

REGULATIONS

- Chapters 24 & 48
- Hard to follow
- Few illustrations
- Obsolete language
- Few incentives for preferred forms of development
- Is there interest in updating the regulations into a Unified Development Ordinance?
